Sovereign Basis					

How Does This Work?

Using the Initial Mini-Conglomerate & Universe Offering Model, MNPG tokenises proprietary Explorations to place the infrastructure, furthering the Digital and Blockchain.

Then outside Mini-Conglomerates & Universes who have gone through the IM-C&UO process, tokenise.

Through the Aggregation, Option Display and IP Distributor, value is created and shared to each investor.

Why Fiat and Non-Fiat?

Without traditional coinage and modern cryptocurrency, they would both not be possible.
